WARNING - IMPORTANT NOTICE TO PARENTS

Before you start constructing and use our product, please carefully read the following safety warning and download our manual from our website. This safety warning and manual contains important information relating to your child's safety. It is your responsibility to review this information with your child and make sure they are fully aware of all the warnings before they start riding. Failure to follow instructions and safety precautions can result in serious injury or death.

You can find a digital copy of the manual at the following web address:

www.infentorides.com

WARNING
This Junior ride has to be assembled by an adult.

PLEASE PRINT OUT THE MANUAL AND KEEP THE MANUAL AND THIS SAFETY WARNING IN A SAFE LOCATION FOR FUTURE REFERENCE.
SAFETY SECTION

WARNING! PARENTAL SUPERVISION AND APPROPRIATE USE

Like any moving product, rides made from Infento parts can be dangerous if due care and attention is not paid. To reduce the risk of serious injury: use only under close adult supervision. Parents must review the following warnings and instructions with each Infento ride that is being built. It is your responsibility to review this information and make sure that all riders understand all warnings, cautions, instructions and safety topics, and assure that young riders are able to safely and responsibly use this product. Infento recommends that you periodically review and reinforce the information in this manual with younger riders, and that you inspect and maintain your child’s Infento rides to ensure their safety.

WARNING! RIDING ON INFENTO RIDES CAN BE A DANGEROUS ACTIVITY

Riding on Infento rides can be a dangerous activity. Certain conditions may cause the equipment to fail without fault of the manufacturer. Rides made from Infento parts can and are intended to move, and it is therefore possible to lose control, fall off and/or get into dangerous situations that no amount of care, instruction or expertise can eliminate. If such things occur you can be seriously injured or die, even when using safety equipment and other precautions. Ride at your own risk and use common sense.

WARNING! NO LIABILITY FOR CONSTRUCTED RIDES THAT DIFFER FROM OUR MANUALS

The rides that you can find in our manuals have been tested by official independent testing agencies. We will not be responsible or liable, directly or indirectly, in any way for any loss or damage of any kind incurred as a result of your decision to build constructions or rides that differ from the official rides that we show in our manuals.

USE – SUBSECTION

WARNING! TO AVOID SERIOUS INJURY:

1. Continuous adult supervision is required.
2. Only ride constructed rides that have been built according to the instructions given in the official Infento manual.
3. Never exceed the maximum weight. You can find the maximum weight for every specific ride in our manual.
4. Always check the manual to see the minimum and maximum age as well as the minimum and maximum length for every specific ride.
5. Always wear safety equipment such as a helmet, knee pads and elbow pads. We recommend riders always wear a properly fitted helmet that complies with local or national guidelines or laws. Keep chinstrap of helmet securely buckled.
6. Always wear closed toed shoes (lace-up shoes with rubber soles), never ride barefooted or in sandals, and keep shoe laces tied and out of the way of the wheels.
7. Avoid streets and surfaces with water, sand, gravel, dirt, leaves, and other debris. Wet weather impairs traction, braking and visibility.
8. Excessive exposure to sunlight, temperatures below 0 degrees Celsius, water, sand, gravel, dirt, leaves, and other debris can damage, shrink, expand or weaken parts. Keep your ride in a dry environment with proper heating.
9. Avoid sharp bumps, drainage grates and sudden surface changes. Your Infento ride may suddenly stop.
10. Ride on smooth, paved surfaces away from motor vehicles. Wet, slick or uneven and rough surfaces may impair traction and contribute to possible accidents.
11. Never risk damaging surfaces, such as carpet or flooring, by use of an Infento ride indoors.
12. Never use near motor vehicles, streets, roadways, alleys, swimming pool areas, hills, steps, sloped driveways, inclines and public highways.
13. Watch out for pedestrians, skaters, skateboards, scooters, bikes, children or animals who may enter your path, and respect the rights and property of others.
15. Do not use at night or in periods with reduced visibility.
16. Before every use, please make sure that the complete ride and all joints have been assembled tightly, as with use, joints may wear out.
17. Before using your Infento ride, please check that the screws are tightened securely.
18. It’s your own responsibility if you modify the product other than manufacturer’s instructions.
19. Maintain a hold on the handlebars at all times. Brake will get hot from continuous use. Do not touch after braking.
20. Periodically check hardware and tighten if necessary. Replace worn or broken parts immediately.
21. Skill is required to avoid falls or collision causing injury to the user and third parties.
22. Check operation of breaks every time before bicycle is ridden.
23. Check local laws before you start with riding.
24. Never tow wagons, other vehicles, or children on skates or skateboards.
25. Make certain that anyone who uses an Infento ride has been fully instructed in its operation.
26. Instruct your child on how to use the breaks.
27. Do not perform stunts.
28. Never use headphones or a cell phone while riding.
29. Only one rider at a time on an Infento ride.
30. Do not allow children to stand on the product at any time.

FAILURE TO USE COMMON SENSE AND HEED THE ABOVE WARNINGS INCREASES RISK OF SERIOUS INJURY. USE WITH APPROPRIATE CAUTION AND SERIOUS ATTENTION TO SAFE OPERATION.
**SAFETY SECTION**

**OUR KITS CONTAIN SMALL PARTS**
This package contains small parts which, before assembly, present a choking hazard to children under the age of three. Care should be taken during unpacking and assembly to insure that all small parts and plastic bags are accounted for and kept out of the reach of children.

**QUESTIONS OR SUPPORT NEEDED?**
You can mail us all your questions at: support@infentorides.com and our team will reply you as soon as possible.

**MAINTENANCE | INSTRUCTION**

1. Oil or grease moving parts periodically.
2. Check nuts and bolts often and tighten if necessary.
3. Any parts showing evidence or wear should be replaced immediately.
4. Follow closely the assembly instructions pertaining to the proper adjustments of parts
5. Periodically check the brake system for proper function
6. Periodically check the steering mechanism for proper function
7. Check the air pressure in the tires to be the amount specified in the manual
8. Periodically check the bicycle’s tooth belt to be sure that it is not too lose which could allow the chain to slip off the sprockets.

**RECOMMENDED TOOLS**

- **4 x Allen key**
  - 3, 4, 5, 6 mm
- **1 x Tapeline**
- **1 x T-handle**
  - for Allen key
- **5 x Wrench**
  - 10, 13, 14, 15, 19 mm
First, get all required materials stated here and then follow the instructions.

Use the Allen key handle so you can tighten the bolt well.

Tighten the bolts with full force. Ensure that you hold the long side of the Allen key in your hand as this enables you to exert greater force.
**TOP 3 REQUIREMENTS MAKING A GREAT INFENTO EXPERIENCE:**

1. **Tighten bolts with full force (15Nm) to prevent them from coming loose.**

2. **Constructing and playing always under supervision of an adult.**

3. **Check frequently if all parts are still firmly tightened and function properly.**
Tighten the bolts with full force. Ensure that you hold the long side of the Allen key in your hand as this enables you to exert greater force.
pull the tire over the rim

Note!

Still not aligned?

You can loosen these bolts with full force, then use the Allen key to provide resistance.

Before tightening it, double check!
If no distance measurement is specified, you should assemble exactly at the edge.

Note!

If no distance measurement is specified, you should assemble exactly at the edge.
There are two types of knurled discs. Please see education section.
There are two types of tightening:

1. Always tighten the bolts with full force.
2. Tighten the bolts with half turn.

After tightening the bolts, note that there is a difference in the connection of the steering rod. To correct this, use a 19mm spanner key to loosen the nut. Let the wheel hold the arm at this position and tighten the nut. Let the wheel hold the arm at this position and tighten the nut.

Note! If this becomes crooked, you can push the slot. If this becomes crooked, you can push the slot. If this becomes crooked, you can push the slot.

Always tighten the two bolts with full force because then you see education section.

Enables you to exert greater force.

Put a 19mm spanner key to correct this.
